PROFESSIONAL SUMMARY

Full Stack .NET Developer with hands-on experience building and deploying web and desktop applications using ASP.NET Core, C#, SQL Server, React.js, and WPF/.NET MAUI. Delivered 12+ projects spanning ERP systems, business web apps, and reservation-based systems, including production systems actively serving real business clients. Strong focus on clean architecture, data integrity, security, and performance. Handles the full delivery cycle — from system design to server configuration and live production deployment.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core (MVC / Web API), REST API Design, Clean Architecture, JWT Authentication, LINQ, Dependency Injection, Design Patterns

Frontend: JavaScript, TypeScript, React.js, Next.js, Bootstrap, Tailwind CSS

Desktop: WPF, .NET MAUI (Blazor Hybrid)

Database: SQL Server, Entity Framework Core, Stored Procedures, Query Optimization, SQLite

Tools: Git, GitHub, Visual Studio, SSMS, Postman, Swagger UI, Figma, Brevo / SMTP, Google Search Console

Deployment & Cloud: Windows VPS, IIS, SSL Configuration, AWS, Azure, Oracle, Cloudflare, Docker

WORK EXPERIENCE

Full Stack Developer | Freelance — Self-Employed 8/2025 – Present

- Design, develop, and deploy full-stack web and desktop applications using ASP.NET Core, C#, SQL Server, React.js, and Next.js
- Build and maintain backend business logic and database architecture with a focus on performance, security, and scalability
- Handle complete server setup, Configuration, SSL installation, and production deployment
- Provide ongoing technical support, system monitoring, and issue resolution for live client systems

IT Support Specialist | Freelance — Self-Employed 09/2023 – Present

- Diagnose and resolve Windows OS, hardware, software, and network issues for individual and business clients
- Install, configure, and optimize software applications and system environments to meet client requirements
- Assist clients with performance optimization and preventive maintenance for their technical infrastructure

Sales Representative | Vooc Store — Alexandria 01/2021 – 09/2023

- Retail sales of mobile accessories with direct client-facing communication and customer service

PROJECTS

Gold & Jewelry Management System · Live Production — 5 Branches | ASP.NET Core, SQL Server, EF Core, Clean Architecture

- Enterprise multi-branch system covering inventory by weight and piece, dynamic gold pricing, sales and purchase operations, user roles and permissions, financial reporting, and full audit trails
- Built a dedicated formula engine for gold purity calculations, weight conversions, labor costs, taxes, and real-time profit margin computation, ensuring precision across every transaction

KMZ HUB — PlayStation Center Management · Live Production — 2 Stores | ASP.NET Core, MAUI, SQL Server

- Desktop platform running the daily operations of a PlayStation gaming center — real-time session tracking, integrated POS terminal, inventory management, and room booking with shift control.
- Built around real operational workflows to minimize human error and handle real-world edge cases, with detailed reporting and PDF export.

Hotel Booking Platform · Personal Project | ASP.NET Core MVC, SQL Server, EF Core, Bootstrap

- Full-stack hotel reservation system with advanced room search and filtering, real-time availability
- Includes online payment processing and a comprehensive admin dashboard for managing hotels, rooms, bookings, users, and financial reports

EDUCATION

Faculty of Science — Software Industry and Multimedia

Expected: 2027

Alexandria University | Alexandria, Egypt

CERTIFICATIONS

React Bootcamp — IEEE Alexandria Student Branch

May 2026

Full Stack Web Development using .NET Core — Digital Egypt Pioneers Initiative (DEPI)

June 2025

- Ranked Top Student — Certificate of Appreciation awarded upon completion

Build with AI: Masr Edition — Google for Developers × ITI (Attended)

June 2026
